MACHINING
FABRICATION
& WELDING
MECHANICAL
TECHNICAL
ELECTRICAL

 **YouTube**

Check out the
disciplines online

MACHINING

You can **become skilled**
in the following trades:

- Manual Milling
- Manual Turning
- Tool Making
- CNC Turning
- CNC Milling
- Quality
- Technical Support

**This can lead to a career
in industries such as:**

- Oil & Gas
- Power
- Defence
- Transport
- Renewables
- Automotive
- Manufacturing

FABRICATION & WELDING

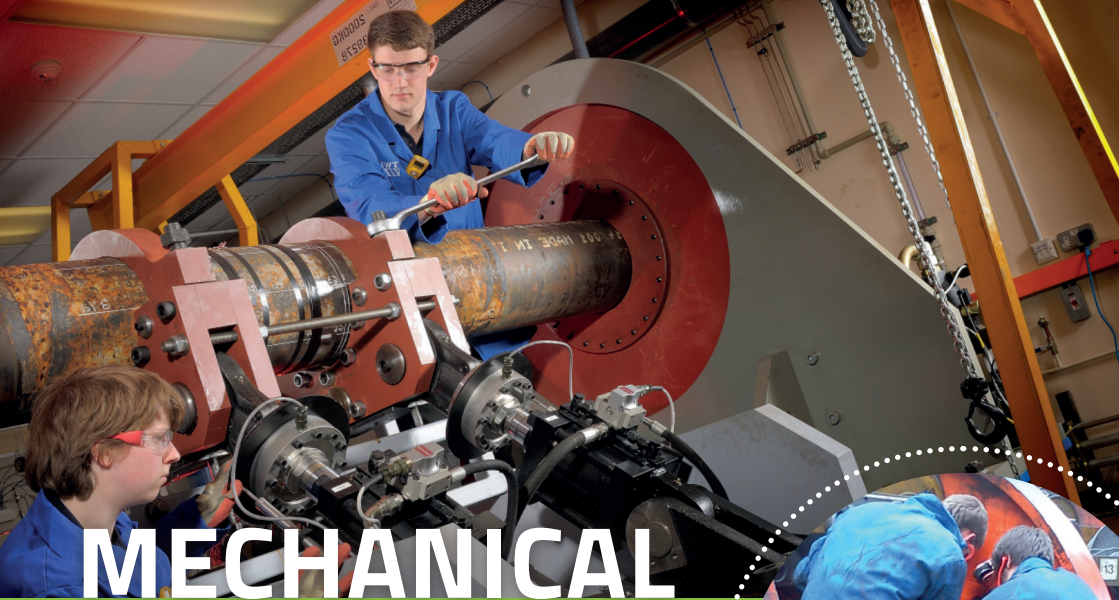

You can **become skilled**
in the following trades:

- Welding
- Fabricating
- Sheet Metal Working
- Plating
- Pipefitting
- Inspection

**This can lead to a career
in industries such as:**

- Oil & Gas
- Power
- Defence
- Ship Building
- Renewables
- Manufacturing

MECHANICAL

You can **become skilled**
in the following trades:

- Mechanical Maintenance
- Mechanical Engineering
- Mechanical Fitting
- Pneumatic Fitting
- Diesel Fitting
- Commissioning Engineering

**This can lead to a career
in industries such as:**

- Oil & Gas
- Power
- Pharmaceutical
- Defence
- Renewables
- Automotive
- Manufacturing
- Food & Drink
- Printing & Packaging
- Transport

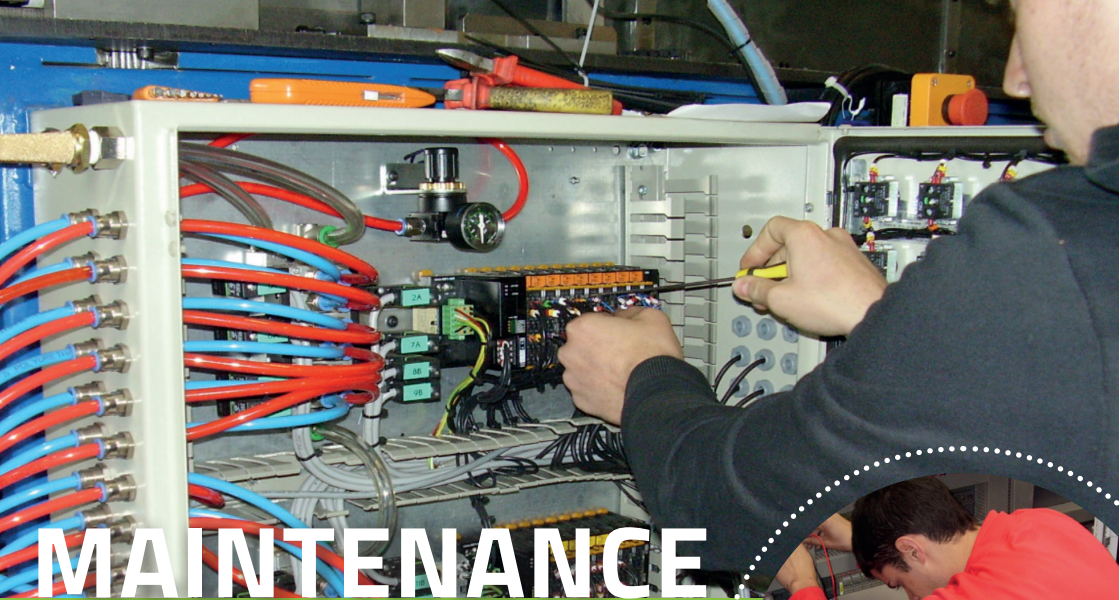

You can **become skilled**
in the following professions:

- Product Design
- Computer Aided Design (CAD)
- Quality Engineering
- Project Engineering
- Inspection
- Production Engineering

**Your skills will have you
supporting:**

- Design Activities
- Engineering Procurement
- Quality Management
- Customer Support
- Production Planning and Monitoring
- Technical Advice Services
- Project Management
- Supplier Liaison

MAINTENANCE

You can **become skilled** in the following trades:

- Electrical Maintenance
- Electrical Engineering
- Testing & Calibration
- Electrical Fitting
- Instrumentation
- Panel Building
- Controls Engineering

This can lead to a career in industries such as:

- Oil & Gas
- Power
- Pharmaceuticals
- Defence
- Renewables
- Automotive
- Manufacturing
- Food & Drink
- Printing & Packaging
- Transport
